Journal of Hospital Medicine Author Contribution Form

The Journal of Hospital Medicine adheres to the authorship guidelines set by the International Committee of Medical Journal Editors – “Authorship should be based on: (1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; (2) drafting the article or revising it critically for important intellectual content; and (3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3” (from www.icmje.org). Authorship is not justified for individuals who simply obtain or provide funding, participate in data collection or general supervision of the research, or serve as head of the group, though such contributors may be acknowledged with their written permission in the Acknowledgements section.

Completion of the author contribution form is not required upon initial manuscript submission. If a revision is requested after initial peer review, the corresponding author should complete this authorship form on behalf of all authors and upload it as Supplementary Material Not for Review. It will appear online as Supporting Information if the article is published. Failure to upload this form will block further manuscript processing.
